Creative Enzymes®

Kiwifruit concentrate powder

Cat. No. KCP-001

Lot. No. (See product label)

Introduction

Description	Kiwifruit concentrate powder contains a naturally potent proteolytic enzyme, actinidin, which enhances protein digestion. In-vitro studies have shown that actinidin enhances the digestion of a number of different food proteins, including soy, red meat, milk, gluten and gliaden. Kiwifruit concentrate powder may also help to improve gut motility, which is an important contributor to improved bowel function. The active enzyme content of Kiwifruit concentrate powder is protected by specialised pre-processing and freeze drying techniques which maintain optimal temperature and pH conditions.

Product Information

Source	green kiwifruit
Appearance	green to brown powder
Form	Freeze dried powder
Activity	>20,000 u/g
