Creative Enzymes®

Immobilized human tissue plasminogen activator, single chain

Cat. No. NATE-1758

Lot. No. (See product label)

Introduction

Description	Useful for controlled plasminogen activation studies. May be used to immuno purify monoclonal and polyclonal antibodies directed against human tPA. May be used repeatedly.
Synonyms	Tissue-type plasminogen activator; EC 3. 4. 21. 68; tPA; t-PA; t-plasminogen activator; TPA; T-PA

Product Information

Species	Human
Source	CHO cells
Form	Resin
EC Number	EC 3. 4. 21. 68
Molecular Weight	70000
Purity	>95% by SDS-PAGE analysis
Concentration	2. 0 mg/ml
Buffer	0.1M HEPES; 0.1M NaCl; 0.02% Sodium Azide; pH 7. 4
Preservative	Sodium Azide
Extinction coefficient	1. 9

Storage and Shipping Information

Storage	4°C
Stability	12 months from delivery
