

3-Hydroxyhexadecanoylcarnitine inner salt

Cat. No. COEC-105

Lot. No. (See product label)

Introduction

Description 3-Hydroxyhexadecanoylcarnitine inner salt is a carnitine derivative, an essential cofactor of the fatty acid metabolism that is required for the transport of fatty acids through the inner mitochondrial membrane.

Applications A carnitine derivative

Synonyms 3-Hydroxypalmitoylcarnitine

Product Information

Form Solid

CAS No. 195207-76-2

Molecular Formula C₂₃H₄₅NO₅

Molecular Weight 415.61

Melting Point >97 °C (subl.)
