Magnolia Extract (Standard)

Cat. No. EXTW-010

Lot. No. (See product label)

Introduction

Description	Magnolia bark is a highly aromatic herbal material obtained from Magnolia officnalis L. of the family Magnoliaceae. The pharmacy item is obtained by stripping the bark from stems, branches and roots. The Chinese name for the herb, houpu, refers to the thick (hou) bark that is the unadorned (pu) portion of the plant.
Applications	It can protect the brain from Alzheimer's disease. As strong antioxidants, it can do well to cardiovascular health. It has the function to inhibit the growth of cancer tumors. It can help calm nerves and alleviate anxiety without side effect. It can inhibit bacteria and pathogenic fungi.

Product Information

CAS No.	Magnolol: 528-43-8 Honokiol: 35354-74-6
Molecular Formula	Magnolol: C18H18O2 Honokiol: C18H18O2
Molecular Weight	Magnolol: 266.33 Honokiol: 266.33
Purity	2.0%~98.0% Magnolol & Honokiol HPLC
Function	Indications: anti-inflammation, Antivirus
