

Giant Knotweed Extract (Standard)

Cat. No. EXTW-011

Lot. No. (See product label)

Introduction

Description Giant Knotweed Rhizome is the dry rhizome and root of *Polygonum cuspidatum* Sieb. et Zucc. Harvest at spring and autumn every year, and remove the fibrous root, make it clean, and then cut it into short pieces or junks, open-air drying.

Applications Studies suggest that resveratrol has anti-atherosclerotic activity and that it might have some immune-stimulating and anti-cancer effects. Human studies are few in number and inconclusive due to short duration and poor design.

Product Information

CAS No. 501-36-0

Molecular Formula C₁₄H₁₂O₃

Molecular Weight 228.24

Purity 50.0%, 98.0% Resveratrol HPLC

Function Indications: Cardiovascular health
