

Hops Flower Extract (Standard)

Cat. No. EXTW-018

Lot. No. (See product label)

Introduction

Description

Hops are the female flower cones, also known as strobiles, of the hop plant (*Humulus lupulus*). The hop is part of the family Cannabaceae, which also includes the genus *Cannabis* (hemp). They are used primarily as a flavoring and stability agent in beer, though hops are also used for various purposes in other beverages and herbal medicine.

Applications

It can inhibit the growth of various bacteria. Such as *Bacillus anthracis*, *Bacillus*, *Corynebacterium diphtheriae*, *Diplococcus pneumoniae* and *Staphylococcus aureus*. It can also help to stimulate appetite, dispel flatulence, and relieve intestinal cramps.

Product Information

CAS No. 6754-58-1

Molecular Formula C₂₁H₂₂O₅

Molecular Weight 354.14

Purity 4.0% Flavones UV

Function Indications: Women menopause, Digestive system
