

Collagenase/Neutral Protease Blend (GMP Grade)

Cat. No. NATE-1917

Lot. No. (See product label)

Introduction

Description

NATE-1917 is an avian and mammalian tissue-free Collagenase and neutral protease enzyme blend produced under GMP quality conditions.

Applications

NATE-1917 is specifically designed for stem cell isolation from human and other adipose tissue with following advantages:

- A single, sterile, ready-to-use vial containing both collagenase and neutral protease can digest up to 280g of adipose tissue with best-in-class GMP quality and shelf life of up to 72 months.
- Currently included in IDE applications approved by the U.S. FDA for alopecia, chronic heart failure, hamstring injuries, osteoarthritis of the knee, and hand manifestations of scleroderma.
- Research protocols are available for dissociating canine, equine, human, ovine, porcine, rabbit and rodent adipose tissue.
- A proprietary, blended proteolytic enzyme designed for efficient, gentle and reproducible in vitro dissociation of nucleated cells from adipose tissue.
- Produced using avian and mammalian tissue-free raw materials, aseptic processes and sterile filtration under GMP guidelines to assure the lowest levels of impurities and stringent quality standards.

Synonyms

Collagenase/Neutral Protease Blend; GMP, Collagenase/Neutral Protease Blend; Collagenase; Neutral Protease; GMP

Product Information

Source

Clostridium histolyticum/Bacillus polymyxa

Appearance

White lyophilizate

Endotoxin Level

< 50 EU/mg

Usage and Packaging

Package

1 vial, 35 mg

Storage and Shipping Information

Stability

48 months at -15 to -25° C
