

# Native Porcine Lipase

Cat. No. NATE-0403

Lot. No. (See product label)

## Introduction

### Description

Triacylglycerol lipase is an enzyme with system name triacylglycerol acylhydrolase. This enzyme catalyses the following chemical reaction: triacylglycerol + H<sub>2</sub>O ⇌ diacylglycerol + a carboxylate. The pancreatic enzyme acts only on an ester-water interface.

### Applications

Lipases are used industrially for the resolution of chiral compounds and the transesterification production of biodiesel.
