Bovine Collagen Type II

Cat. No. NATE-4924

Lot. No. (See product label)

Introduction

Description	Bovine Collagen Type II (Nasal Cartilage) is one of a family of proteins found particularly in the flesh and connective tissues of mammals (approximately one-third of the body's total protein). Over two dozen types of collagen have been described; Type II is found predominantly in hyaline cartilage (50% of the protein in hyaline is collagen type II) and is also found in the vitreous humor of the eye.
Applications	Bovine Collagen Type II can be utilized as a control or standard reagent in Western Blotting and ELISA experiments.
Synonyms	Type II collagen, collagen 2, bovine collagen, collagen protein Type II, bovine collagen Type II protein

Product Information

Source	Bovine
Form	Liquid (sterile filtered)

Storage and Shipping Information

Storage	Store vial at 4° C prior to opening. Bovine Collagen Type II (Nasal Cartilage) is stable at 4° C as an undiluted liquid. Dilute only prior to immediate use.
