

Bovine Collagen Type II

Cat. No. NATE-4924

Lot. No. (See product label)

Introduction

Description Bovine Collagen Type II (Nasal Cartilage) is one of a family of proteins found particularly in the flesh and connective tissues of mammals (approximately one-third of the body's total protein). Over two dozen types of collagen have been described; Type II is found predominantly in hyaline cartilage (50% of the protein in hyaline is collagen type II) and is also found in the vitreous humor of the eye.

Applications Bovine Collagen Type II can be utilized as a control or standard reagent in Western Blotting and ELISA experiments.

Synonyms Type II collagen, collagen 2, bovine collagen, collagen protein Type II, bovine collagen Type II protein

Product Information

Source Bovine

Form Liquid (sterile filtered)
