

Probiotics blend for caries protection

Cat. No. PRBT-074

Lot. No. (See product label)

Introduction

Description

Probiotics Blend of L. Salivarius, L. Plantarum, L. Casei, L. Reuteri, L. Rhamnosus

Applications

Probiotics have become the star components of oral health products due to their bacteriostatic and immunomodulatory ability. The surfactant and lipoic acid secreted by probiotics can inhibit the formation of pathogenic biofilm, thus inhibiting the expression of pathogenic virulence genes. In short, probiotics can prevent dental caries and improve oral health.

Product Information

Appearance

White to light yellow-free-flowing powder

Form

powder

Activity

100 billion CFU/g or more

Stabilizers

24 Months

Storage and Shipping Information

Storage

Recommend storage at frozen temperature (-18 °C) or lower in original, sealed package away from light.
