

Corn starch (food grade)

Cat. No. EXTZ-210

Lot. No. (See product label)

Introduction

Description Corn starch is a white or light-yellow powder that is refined from high-quality corn as raw material through processes such as dipping, crushing, separation, refining, and drying. Not only can be used directly, but also an important industrial raw material, widely used in food, sugar, fermentation, medicine, paper, chemical and other industries.
