

## Alginate lyase (food grade)

Cat. No. NATZ-009

Lot. No. (See product label)

### Introduction

**Description** Alginate lyases are present in a variety of organisms, such as algae, mollusks, fungi, bacteria, bacteriophages, viruses, etc. Alginate lyase degrades alginate to a series of unsaturated alginate oligosaccharides via a  $\beta$ -elimination reaction.

### Product Information

**Form** powder
