Hydrolyzed keratin

Cat. No. EXTZ-256

Lot. No. (See product label)

Introduction

Description	Hydrolyzed Keratin Protein is a clear amber liquid popularly derived from wool protein. Hydrolyzed Keratin is known to increase cysteine available to the hair, thus, diminishing and curing the hair of damage. Its also known to increase the tensile strength of the hair. Hydrolyzed Keratin increases hair cell elasticity and volume. Its also known to have very high moisture binding capabilities thereby aiding hair strenght and fluidity, this in turn increases hair luster, body, and increasing manageability.
