Creative Enzymes®

D-Ribose powder

Cat. No. EXTZ-318

Lot. No. (See product label)

Introduction

Description	Ribose also known as D-ribose, is a sugar molecule that occurs naturally in the body and is made from blood glucose. It is closely related to the formation of adenylic acid and the regeneration of ATP, and is one of the most basic energy sources for life metabolism. Plays a key role in heart and skeletal muscle metabolism, and can promote the recovery of ischemic and hypoxic tissues.
