

Mustard oil

Cat. No. EXTZ-344

Lot. No. (See product label)

Introduction

Description Mustard oil is pressed from the cruciferous plants black mustard and white mustard. The allyl isothiocyanate contained in it not only has the effect of anti-mold and sterilization, but also prevents the proliferation of bacteria in the oral cavity and reduces the incidence of dental caries. In addition, mustard oil is also a kind of seasoning, which has a stimulating taste and can promote the secretion of saliva and gastric juice, so it can increase appetite.
