

2-Deoxyribose 5-phosphate Aldolase from E. coli, Recombinant

Cat. No. NATE-0794

Lot. No. (See product label)

Introduction

Description Deoxyriboaldolase catalyzes the condensation of acetaldehyde and glyceraldehyde 3-phosphate to 2-

deoxyribose 5-phosphate. This enzyme belongs to the family of lyases, specifically the aldehyde-lyases,

which cleave carbon-carbon bonds. This enzyme participates in pentose phosphate pathway.

Synonyms 2-deoxy-D-ribose-5-phosphate acetaldehyde-lyase (D-glyceraldehyde-3-phosphate-forming);

phosphodeoxyriboaldolase; deoxyriboaldolase; deoxyribose-5-phosphate aldolase; 2-deoxyribose-5-phosphate aldolase; 2-deoxyr-D-ribose-5-phosphate acetaldehyde-lyase; deoxyribose-phosphate aldolase;

EC 4.1.2.4; DERA; 9026-97-5

Product Information

Species E. coli

Source E. coli K12

EC Number EC 4.1.2.4

CAS No. 9026-97-5

Activity >2 U/mg

Unit 1 U corresponds to the amount of enzyme which converts 1 µmol 2-Deoxy-D-ribose-5-phosphate per

Definition minute at pH 7.5 and 25°C.

Storage and Shipping Information

Storage Store at -20°C
