Creative Enzymes®

L-Arginine

Cat. No. EXTZ-363

Lot. No. (See product label)

Introduction

Description	L-arginine is a conditionally essential basic amino acid, mainly involved in the metabolism and excretion of urea, as well as the synthesis of DNA and the production of protein. Normally, the body produces all the necessary L-arginine. L-arginine is also found in most protein-rich foods, including fish, red meat, poultry, soybeans, whole grains, legumes, and dairy products.
