

Native Pea sprouts Diamine Oxidase powder (Food grade)

Cat. No. EXTZ-395

Lot. No. (See product label)

Introduction

Description

Pea sprouts are a common vegetable, also known as "pea tips", "asparagus vegetables", and "asparagus sprouts", which are cultivated from peas. Studies have reported that freeze-dried pea sprouts powder has diamine oxidase activity, which can degrade histamine.

Applications

A digestive health ingredient for histamine intolerance

Product Information

Source

Pea sprouts

Form

Green powder

Activity

The DAO enzyme contained in the Active Ingredient presents an enzymatic activity of over 600 mU/g

Unit Definition

One unit of enzyme activity was defined as the amount of H₂O₂ produced by decomposing cadaverine per gram of sample per hour.

Storage and Shipping Information

Storage

2-8°C
