Tenebrio molitor powder

Cat. No. EXTZ-397

Lot. No. (See product label)

Introduction

Description	Tenebrio molitor, commonly known as mealworm, is an insect of the order Coleoptera. Defatted Tenebrio molitor powder is a low-cost protein material, because it contains 17 kinds of amino acids, protein and chitin, so it has a significant effect on improving the immunity of livestock and poultry.
