Creative Enzymes®

Collagenase I + Collagenase II + Thermolysin (GMP grade)

Cat. No. CELBrase-001

Lot. No. (See product label)

Introduction

Description	CELBrase-001 contains highly purified collagenase class I and class II with a medium concentration of highly purified thermolysin. The two collagenase isoforms are from clostridium histolyticum and blended in a precise ratio with each other. Thermolysin is a neutral protease isolated from Bacillus thermoproteolyticus. The blend is manufactured in accordance with Good Manufacturing Practice (GMP).
Applications	For tissue dissociation

Product Information

Form	Powder
Endotoxin Level	≤50 EU/mg protein

Storage and Shipping Information

Storage	at -20°C
