

Phytase from Aspergillus niger (food grade)

Cat. No. PYAG-100

Lot. No. (See product label)

Introduction

Description Phytase is a general term for enzymes that catalyze the hydrolysis of phytic acid

and its salts to inositol and phosphoric acid. Phytic acid, also known as inositol 6-phosphate, is the reservoir of phosphoric acid. The mineral elements are separated from the complex by phytase, increasing the nutritional value of the minerals.

Phytase is widely used in food, feed, medicine, and other fields.

Product Information

Source Aspergillus niger

Form powder

EC Number EC3.1.3.8
