Creative Enzymes®

Elastin Peptides from Mouse Lung

Cat. No. CEFX-008

Lot. No. (See product label)

Introduction

Description	Mouse lung elastin peptide is obtained by enzymatic treatment of mouse lung elastin with mouse pancreatic elastase, followed by removal of residual elastase by affinity chromatography. The final peptide was obtained by dialysis, filtration and lyophilization. The prepared peptides were salt-free and soluble in water and biological buffer solution.

Product Information

Species	Mouse
Source	Mouse Lung
Form	Powder
