Topoisomerase IV from Pseudomonas aeruginosa, Recombinant

Cat. No. NATE-3206

Lot. No. (See product label)

Introduction

Description	Pseudomonas aeruginosa topo IV is prepared by overexpressing the subunits in E. coli. The topo IV is supplied as a heterotetramer complex in Dilution buffer. It is supplied with 5X concentrated Assay Buffer and Dilution buffers

Product Information

Species	Pseudomonas aeruginosa
Source	E.coli
Form	Liquid
EC Number	EC 5.99.1.
Purity	>95%
Activity	5 U/μl

Storage and Shipping Information

Storage	at -80°C
