

## Topoisomerase IV from *Streptococcus pneumoniae*, Recombinant

Cat. No. NATE-3207

Lot. No. (See product label)

### Introduction

**Description** Topo IV (from *Streptococcus pneumoniae*) is prepared by overexpressing the subunits in *E. coli*. The topo IV is supplied as a heterotetramer complex in Dilution buffer. It is supplied with 5X concentrated Assay Buffer and Dilution buffers

### Product Information

**Species** *S. pneumoniae*

**Source** *E. coli*

**Form** Liquid

**EC Number** EC 5.99.1.

**Purity** >95%

**Activity** 5 U/μl

### Storage and Shipping Information

**Storage** at -80°C
