

Aquatic probiotic: nitrifying bacteria

Cat. No. APNB-001

Lot. No. (See product label)

Introduction

Description APNB-001 is a high-tech product developed by our company, containing *Bacillus subtilis*, nitrifying bacteria, yeast, lactic acid bacteria, photosynthetic bacteria and other effective strains. After further concentration, it is ensured that the bacterial species are complete, the bacterial count is high, and the bacterial activity is good. Degrading nitrite has two characteristics: powerful and special effects. It is another major breakthrough and innovation in the field of water purification.
