Creative Enzymes®

Bladderwrack Extract

Cat. No. CEFX-040

Lot. No. (See product label)

Introduction

Description	Bladderwrack extract is a plant extract commonly used in cosmetics and skin care products. Bladderwrack is a cyanobacteria that grows in the ocean and is rich in many nutrients and active ingredients. Bladderwrack extract has strong antioxidant properties that can help protect against free radical damage and prevent skin aging. It also has moisturizing and calming properties that improve the skin's moisture balance and reduce dryness and sensitivity. Additionally, Bladderwrack extract has anti-inflammatory and antibacterial properties that can reduce problems caused by skin inflammation and effectively cleanse and soothe the skin. It also promotes skin cell regeneration and repair, accelerating the wound healing process.
Applications	Bladderwrack extract is widely used in skincare products, including creams, masks, and serums, to provide total skin care and protection. It is suitable for all skin types and is especially effective in treating dry, sensitive, and aging skin.
