

Sarracenia Purpurea Extract

Cat. No. CEFX-045

Lot. No. (See product label)

Introduction

Description Sarracenia purpurea extract is a natural plant extract obtained from seeds. Sarracenia purpurea is an ornamental floral and herbal plant native to South America, whose seeds are rich in a variety of active ingredients. Sarracenia purpurea seed extract has many bioactive and pharmacological properties. It is rich in polyphenolic compounds such as flavonoids, phenolic acids, and flavonols, which have powerful antioxidant and anti-inflammatory properties. Sarracenia purpurea seed extract also contains a variety of biologically active substances, such as volatile oils, vitamins, and minerals, which provide nourishment and protection to the skin.

Applications Herbal Remedies: Used in tinctures or capsules for traditional immune and respiratory support. Skincare: Added to serums, creams, and lotions for its soothing and hydrating properties. Cosmetics: Incorporated in anti-aging formulations due to its antioxidant properties.

Product Information

Species Sarracenia purpurea

Source Seed

Appearance Light brown powder

Activity 10:1 by TLC

Function Anti-Inflammatory: Helps reduce redness and inflammation, making it beneficial for sensitive or irritated skin. Antimicrobial: May aid in combating bacterial or fungal infections. Skin Hydration: Promotes moisture retention and supports skin barrier function. Immune Modulation: Potential application in boosting immune responses.

Usage and Packaging

Package 25KG/Drum with double plastic bag of foodstuff inside

Storage and Shipping Information

Storage Store in a cool, ventilated and dry place, avoid direct sunlight.
