

Sarsaparilla Root Extract

Cat. No. CEFX-058

Lot. No. (See product label)

Introduction

Description Sarsaparilla Root Extract is a natural ingredient obtained from the rhizome of Smilax chinaL. in the family Smilacaceae. Sarsaparilla is a common herb widely distributed in Asia. Sarsaparilla root extract is rich in a number of active ingredients, including a variety of monoterpene ketones, flavonoids, aromatic acids and polysaccharides. These constituents are believed to possess a variety of biological activities such as anti-inflammatory, antioxidant, antimicrobial, antitumor, and modulation of the immune system. Sarsaparilla root extract is widely used in skin care products. It is believed to have the effect of tightening pores, balancing oil production, and brightening skin tone. In addition, sarsaparilla root extract has the ability to soothe the skin and reduce redness and itching.
