Beef Bone Peptone

Cat. No. CEFX-070

Lot. No. (See product label)

Introduction

Description	Beef Bone Peptone is an organic compound. It is a yellowish powder with a special smell of meat, which is made by slightly hydrolyzing fresh meat and bone with acid or biological enzyme and then drying it. Bone Peptone is rich in organic nitrogen compounds, vitamins and sugars, and is nutritious.
Applications	Raw material for culture medium and biochemical experiments.
