

Soy Peptone

Cat. No. CEFX-071

Lot. No. (See product label)

Introduction

Description

Soy Peptone is a light yellow dry powder obtained from high quality soybeans by degreasing, enzymolysis, fine filtration, concentration and spray drying using molecular weight control technology. In addition to nitrogenous components, it is also rich in carbohydrates and vitamins, and is suitable for the growth of a very wide range of bacteria, including fungi.

Applications

As the main raw material of microbial culture medium, it is widely used in the field of microbiology and pharmaceuticals. Plant peptone, especially soy peptone, is specially used for the cultivation of Streptococcus, Pneumococcus, Borrelia burgdorferi, and so on, which is rich in nutrients, and it can also be used as fermentation raw material for industrialized production.
