

## Chrysin

Cat. No. CEFX-082

Lot. No. (See product label)

### Introduction

#### Description

Chrysin is a flavonoid with a wide range of pharmacological activities extracted from wood butterfly, family Zygothylaceae. Chrysin has a high amount in propolis, light yellow prismatic crystals (crystallized from methanol), melting point of 285°C. Soluble in alkali hydroxide solution, slightly soluble in ether, ethanol and chloroform, insoluble in water. Chrysin is the raw material for the synthesis of anticancer, hypolipidemic, anti-cardiovascular disease, antibacterial, anti-inflammatory and other drugs.

### Product Information

<b>Form</b>	Powder
<b>CAS No.</b>	480-40-0
<b>Molecular Weight</b>	254.24
<b>Purity</b>	0.98

### Storage and Shipping Information

<b>Storage</b>	2 years under well storage situation and stored away from direct sun light
