

## Vitamin K2 Oil

Cat. No. CEFX-107

Lot. No. (See product label)

### Introduction

**Description** Vitamin K2 is a naturally occurring vitamin that contains the basic structure of menaquinone and has anti-hemorrhagic effects. It is a yellow crystal or oily liquid at room temperature, insoluble in water, easily soluble in organic solvents and vegetable oils, and heat-resistant, but easily destroyed by light. It can promote the synthesis of prothrombinogen by liver and regulate the synthesis of coagulation factors VII, IX and X, thus accelerating blood coagulation.

### Product Information

<b>Form</b>	liquid
<b>CAS No.</b>	84-81-1
<b>Molecular Weight</b>	580.88

### Storage and Shipping Information

**Storage** Keep sealed, away from light and in a dry place (recommended storage temperature below 27°C).
