Creative Enzymes®

Native Amano Lipase from Pseudomonas fluorescens

Cat. No. CEFX-121

Lot. No. (See product label)

Introduction

Applications	Native Amano Lipase from Pseudomonas fluorescens can be used as a biocatalyst in the: Hydrolysis and transesterification of parabens (para-hydroxybenzoic acid esters). Enzymatic kinetic resolution of chlorohydrins. Regio-selective acylation of andrographolide with different acylating agents to synthesize andrographolide derivatives.

Product Information

Source	Pseudomonas fluorescens
Form	Powder
EC Number	232-619-9
CAS No.	9001-62-1
Activity	20,000 U/g

Storage and Shipping Information

Storage	Sealed, dark, dry, at cool place
