

## Native Amano Lipase from Pseudomonas fluorescens

Cat. No. CEFX-121

Lot. No. (See product label)

### Introduction

**Applications** Native Amano Lipase from Pseudomonas fluorescens can be used as a biocatalyst in the: Hydrolysis and transesterification of parabens (para-hydroxybenzoic acid esters). Enzymatic kinetic resolution of chlorohydrins. Regio-selective acylation of andrographolide with different acylating agents to synthesize andrographolide derivatives.

### Product Information

**Source** Pseudomonas fluorescens

**Form** Powder

**EC Number** 232-619-9

**CAS No.** 9001-62-1

**Activity** 20,000 U/g

### Storage and Shipping Information

**Storage** Sealed, dark, dry, at cool place
