

Kidney Peptide

Cat. No. CAFP-012

Lot. No. (See product label)

Introduction

Description Kidney Peptide is a highly active small molecule peptide powder made from the kidney of bovine or sheep as raw material, after low temperature treatment, tissue crushing, bio-enzymatic digestion, purification, concentration, centrifugal spray drying. Kidney peptide is a mixture of many kinds of small molecule peptides and amino acids, which contains rich essential amino acids, trace elements and vitamins. It has the characteristics of small molecule, strong activity, easy absorption, etc. It can quickly participate in the physiological activities of the human body and promote the absorption of other nutrients, and can be added to various types of food and health food.

Product Information

Source Bovine or Sheep Kidney

Appearance Off-white powder

Molecular Weight <1000 Da

Purity 99%

Solubility Water-soluble

Usage and Packaging

Package 1kg, 5kg, 10kg aluminum foil vacuum bag; or 20kg, 25kg Fiber Drum

Storage and Shipping Information

Storage Store in a cool, ventilated and dry place, avoid direct sunlight.
