Creative Enzymes®

Magnesium Ascorbyl Phosphate

Cat. No. CEFX-164

Lot. No. (See product label)

Introduction

Description	Magnesium Ascorbyl Phosphate, sometimes called MAP, is a white or yellowish powdered substance. MAP can be enzymatically cleaved to ascorbic acid by the enzyme phosphatase in the skin, which plays a physiological role. This means that it can enter into the cell and be converted into vitamin C. Functions: 1. Inhibit tyrosinase activity, restore melanin, with spot whitening effect. 2. It can eliminate oxygen free radicals after entering the body, thus it has the function of removing wrinkles and anti-aging. 3. It has synergistic effect with vitamin E.

Product Information

Appearance	Powder
CAS No.	113170-55-1
Molecular Weight	759.22
Purity	98%

Usage and Packaging

Package	25KG/Drum with double plastic bag of foodstuff inside

Storage and Shipping Information

Storage	2 years under well storage situation and stored away from direct sun light
