Creative Enzymes®

L-Lysine

Cat. No. EXTZ-494

Lot. No. (See product label)

Introduction

Description	Lysine is one of the essential amino acids for the human body and an important substance involved in human metabolism. The body cannot produce it on its own, so it must be obtained through daily diet or nutritional supplements. Lysine is a key substance that helps other nutrients be fully absorbed and utilized by the human body. Supplementing sufficient L-lysine can improve the absorption and utilization of food protein, achieve balanced nutrition, and promote growth and development.
