

## Hydrolyzed brown rice protein

*Cat. No. EXTZ-507*

*Lot. No.* (See product label)

### ***Introduction***

**Description** Hydrolyzed brown rice protein is a protein derivative obtained from brown rice protein through a hydrolysis process. This process breaks down the complex protein structure, making the peptides and amino acids easier to digest and absorb. Compared to non-hydrolyzed protein, hydrolyzed protein typically reduces allergenicity for certain sensitive individuals.
