Palmitoyl Tripeptide-1

Cat. No. CECP-012

Lot. No. (See product label)

Introduction

Description	Collagen is a representative component of the extracellular matrix (ECM). Palmitoyl tripeptide-1 (Pal-GHK), in which GHK is derived from a fragment on the collagen chain of type I, promotes the synthesis of type I collagen in the organism, and has an obvious regulatory and promotional effect on collagen synthesis in skin cells.
Applications	Used in eye care products to reduce the appearance of eye lines. Used in face and neck care products to improve wrinkles. It can be used in combination with other anti-wrinkle peptides for synergistic effect.

Product Information

Appearance	Clarified clear liquid
Form	Liquid
CAS No.	147732-56-7
pH Stability	3.0-5.0

Usage and Packaging

Package	1kg/bottle

Storage and Shipping Information

Storage	Keep sealed, shaded and cool.
