Creative Enzymes®

Hexapeptide-9

Cat. No. CECP-025

Lot. No. (See product label)

Introduction

Description	Hexapeptide-9 can bind to fibroblasts to trigger the synthesis of intercellular molecules, providing a strong regenerative signal to the skin, a signal similar to that emitted by intercellular remodeling. 1. Promotes collagen synthesis by dermal fibroblasts to replenish dermal collagen content. 2. Promotes the formation and reinforcement of the epidermal-dermal junction tissue (DEJ). 3. Promote the differentiation and maturation of epidermal keratinized cells, with skin repair effects, especially for the repair of acne marks has a very peculiar effect.
Applications	Used in acne mark removal, fine line removal, strong repair and skin tightening products.

Product Information

Appearance	Clarified clear liquid
Form	Liquid
CAS No.	1228371-11-6
pH Stability	4.0-6.0

Usage and Packaging

Package	1kg/bottle

Storage and Shipping Information

Storage	Keep sealed, shaded and cool.
