Myristoyl Pentapeptide-4

Cat. No. CECP-026

Lot. No. (See product label)

Introduction

Description	Myristoyl Pentapeptide-4 is a signal peptide targeting keratinocytes, which stimulates the expression of keratin genes in the human body, breaks the dormant phase of eyelash growth, generates more keratin, thereby promoting eyelash growth, and increasing eyelash length and thickness. It is a safe peptide for eyelash growth. Experiments have shown that Myristoyl Pentapeptide-4 has a precise stimulating effect on keratin expression, significantly increasing keratin gene expression. The increase in keratin density and length notably promotes eyelash growth.
Applications	Used to promote eyelash growth, scalp growth and other products.

Product Information

Appearance	Clarified clear liquid
Form	Liquid
CAS No.	959610-30-1
pH Stability	3.0-5.0

Usage and Packaging

Package	1kg/bottle

Storage and Shipping Information

Storage	Keep sealed, shaded and cool.
