

Soothing and Repairing Peptide Solution

Cat. No. CECP-030

Lot. No. (See product label)

Introduction

Description

Palmitoyl Tripeptide-8 Reduces the release of neuropeptide P and pro-inflammatory cytokines; Decreases vasodilation and permeability, quickly reduces redness; Maintains and restores the normal sensitivity threshold of the skin. Acetyl Heptapeptide-4 Increases the adhesion and stability of beneficial bacterial micro-ecology, repairs the skin barrier; Improves skin immune response, reduces the release of various inflammatory factors. Hexapeptide-9 Promotes the differentiation and maturation of keratinocytes, repairs the skin barrier; Promotes the formation and reinforcement of the DEJ (dermal-epidermal junction); Promotes collagen synthesis by fibroblasts in the dermis. Palmitoyl Tripeptide-1 Classic GHK sequence effectively promotes the synthesis of type I collagen. Acetyl Hexapeptide-1 New dual-effect hexapeptide for smoothing and anti-wrinkle, promotes collagen production.

Applications

For daily soothing and repair of sensitive and intolerant skin, after-sun care and daily skin protection.
