Acne Repair Peptide

Cat. No. CECP-031

Lot. No. (See product label)

Introduction

Description	Acne Repair Peptide is a bioactive peptide based acne technology, composed of three peptides, based on the formation mechanism of acne and acne marks, strong anti-inflammatory, accelerate acne repair, prevent acne marks and scars. 1. Anti-inflammatory The powerful anti-inflammatory activity of bee venom peptide reduces the continuous stimulation of inflammation and accelerates acne repair. 2. Reduce pigmentation Miraculous nine peptides inhibit tyrosinase activation, reducing pigmentation. 3. Acne mark repair The new hexapeptide promotes collagen regeneration, accelerating skin reconstruction and repair.
Applications	Specially developed for acne skin, suitable for daily care of acne and sensitive skin. It can be used in acne pen, acne gel, whole face acne treatment products. Recommended dosage: 3-5%.
