

Biotin Tripeptide-1

Cat. No. CECP-033

Lot. No. (See product label)

Introduction

Description Biotin Tripeptide-1 is a tripeptide that combines Biotin (Vitamin H) and the Matrikine signaling peptide GHK. Biotin improves the body's keratin infrastructure and is an important nutrient for hair growth. Biotin Tripeptide-1 combines the characteristics of both, synergistic effect, can effectively reduce the production of DHT, strengthen the hair follicle, stimulate the expression of keratin gene, to fight against hair follicle aging, it is a safe and effective active peptide to prevent hair loss. 1. It can effectively stimulate the synthesis of keratin, an important component of hair, and promote hair growth. 2. Repair damaged hair from the deeper level, make hair thicker and tougher. 3. Compared with the commonly used hair growth agents such as Minoxidil (low efficiency and many side effects), this product is safe and has no irritation and toxic side effects at the recommended dosage.

Applications It is used in all kinds of care products to strengthen hair and prevent hair loss, and the effect of compound application is better.

Product Information

Appearance Clarified clear liquid

Form Liquid

CAS No. 58-85-5

pH Stability 3.0-5.0

Usage and Packaging

Package 1kg/bottle

Storage and Shipping Information

Storage Keep sealed, shaded and cool.
