Creative Enzymes®

Probiotic defender pro

Cat. No. PRBF-009

Lot. No. (See product label)

Introduction

Description

Probiotic defender pro is a complex micro-ecological preparation made from a variety of functional probiotics. The selected strains have been evaluated in the laboratory to have significant inhibitory effects on common pathogenic bacteria, such as gram-negative and gram-positive bacteria. At the same time, they can produce a large number of enzymes, which can promote the digestion and absorption of various substrates in the feed.

Applications

Suitable for piglets and small nursery, egg birds, meat birds and other farm animals. 1. Excellent stability and resistance to acid and bile salts. 2. It can have obvious inhibitory effect on common pathogenic bacteria such as Escherichia coli, Salmonella, Staphylococcus aureus and so on. 3. Promote the growth of normal anaerobic bacteria in the intestinal tract, adjust the intestinal flora imbalance, and restore intestinal function. 4. It has excellent alleviating effect on diarrhea and acute enteritis caused by bacterial infection. 5. Promote the molding of animal feces, reduce the emission of harmful gases, and improve the environment of animal breeding. Usage and dosage 1. Add 500g-1000g per ton for suckling and small nursery, 100g-500g per ton for large nursery and fertilizer. 2. Add 100g-500g per ton for piglet and sow, 100g-500g per ton for poultry.

Product Information

Appearance

Uniform color powder

Composition

Enterococcus faecalis, Lactococcus lactis, Bacillus subtilis, Bacillus licheniformis and their metabolites.

Storage and Shipping Information

Storage

Store in a ventilated, cool, dry place for up to 12 months.
