Lycopene Microencapsulated Powder

Cat. No. EXTZ-518

Lot. No. (See product label)

Introduction

Description	Lycopene is a carotenoid that naturally occurs in tomatoes and other red fruits, possessing strong antioxidant properties and offering multiple health benefits. Lycopene microencapsulated powder is produced using microencapsulation technology to encase lycopene in tiny spherical structures, resulting in a stable, easily stored, and portable powdered formulation. This powder can be used as a standalone nutritional supplement to increase the intake of lycopene in the daily diet.
