Creative Enzymes®

Selenium-Enriched Natto Peptides

Cat. No. EXTZ-531

Lot. No. (See product label)

Introduction

Description	Selenium-Enriched Natto Peptides are natural peptides extracted from natto, enriched with the essential trace mineral selenium. This product combines the health benefits of natto with the antioxidant properties of selenium, offering a multitude of health functions. Selenium-Enriched Natto Peptides can help enhance immunity, lower cholesterol, prevent cardiovascular diseases, and combat aging. They are widely used as dietary supplements in health foods and functional beverages, providing comprehensive health support for consumers.
