Devil's Claw Extract

Cat. No. CEFX-284

Lot. No. (See product label)

Introduction

Description	Devil's Claw Extract is derived from the root of the Devil's Claw plant (Harpagophytum procumbens), native to the Kalahari Desert in Southern Africa. Renowned for its distinctive claw-like seed pods, this plant has been traditionally used for its medicinal properties. The extract is prized for its anti-inflammatory and analgesic benefits. Devil's Claw Extract contains bioactive compounds, primarily iridoid glycosides such as harpagoside, which are responsible for its therapeutic effects. It is widely used to alleviate pain and inflammation, particularly in conditions such as arthritis, back pain, and muscle soreness. Additionally, Devil's Claw is believed to aid in digestion and improve appetite.
Applications	Devil’s Claw Extract is widely used for its anti-inflammatory and analgesic properties in the following areas: Joint Health: Used to relieve pain and inflammation caused by rheumatoid arthritis, osteoarthritis, and sports injuries. Pain Management: Suitable for the short-term management of chronic back pain, neck pain, and acute pain. Digestive Health: Used to treat indigestion, excessive stomach acid, loss of appetite, and to promote gastrointestinal health. Sports and Rehabilitation: Employed by athletes and in physical therapy to reduce post-exercise inflammation and pain, and to accelerate recovery. Skin Health: Topical formulations can relieve skin inflammation and pain, such as eczema and psoriasis. Pet Health: Helps alleviate arthritis and joint pain in elderly pets. Alternative Medicine: Used in herbal and natural therapies for various inflammatory diseases and pain management.

Product Information

Appearance	Light-yellow powder
Form	powder
Purity	10 ratio 1

Usage and Packaging

Package	1kg/aluminum foil bag or 25kg/cardboard drum

Storage and Shipping Information

Storage	The product should be sealed and shielded from light, avoid high temperature, stored in a dry, cool, well-ventilated place.
