Creative Enzymes®

Peanut Peptide

Cat. No. CEFP-036

Lot. No. (See product label)

Introduction

Description	This product is a small molecule active peptide product made from peanut protein or peanut meal through biological enzyme digestion technology. Peanut protein is rich in amino acids, containing the eight essential amino acids needed by the human body, belonging to the complete protein, and the small molecule peptide produced after its enzymatic digestion is more easily absorbed.
Applications	Peanut peptides can be used as nutritional supplements in food to provide high-quality protein and enhance immunity. In cosmetics, it has moisturizing, antioxidant and anti-aging effects. In medicine, it helps to lower blood pressure, blood lipids and promote intestinal health to prevent cardiovascular disease and metabolic syndrome.
